## Table of Contents

A. Program Identification and General Information ..... 3
B. Mission, Objectives, and Program Learning Outcomes ..... 5
C. Curriculum ..... 6
D. Student Admission and Support: ..... 12
E. Faculty and Administrative Staff: ..... 13
F. Learning Resources, Facilities, and Equipment: ..... 15
G. Program Quality Assurance: ..... 16
H. Specification Approval Data: ..... 24

## A. Program Identification and General Information

## 1. Program's Main Location :

College of Science, Main Campus, Alfaraa, Abha, Saudi Arabia

## 2. Branches Offering the Program (if any):

- College of Science, King Abdullah Road Campus (Female), Abha
- College of Science and Arts, Sarat-Abidah Campus (Female), Sarat Abidah
- College of Science and Arts, Muhail-Asir Campus (Female), Muhail Asir

## 3. Partnerships with other parties (if any) and the nature of each:

None

## 4. Professions/jobs for which students are qualified

- Teaching in various stages of pre-university education.
- Working in the industrial fields that related to chemistry.
- Working as assistant teaching staff in Saudi universities.
- Working in research centers, public and private institutions that require skills in chemistry
- Working in institutions of higher education.

## 5. Relevant occupational/ Professional sectors:

- Universities
- Industrial sectors (Industries related to chemistry)
- Pre-university educational institutions.
- Research centers
- Institutions of higher education.

| 6. Major Tracks/Pathways (if any): |  |  |  |  |
| :--- | :--- | :--- | :---: | :---: |
| Major track/pathway | Credit hours <br> (For each track) | Professions/jobs <br> (For each track) |  |  |
| 1. None |  |  |  |  |
| 2. |  |  |  |  |
| 3. |  |  |  |  |
| … |  |  |  |  |
| 7. Exit Points/Awarded Degree (if any): |  |  |  |  |
| exit points/awarded degree |  |  |  |  |

1. None
2. 

## B. Mission, Objectives, and Program Learning Outcomes

## 1. Program Mission:

Preparing competitor graduates for the labor market and graduate studies as well as contributing to community service.

## 2. Program Goals:

1. To prepare competitor graduates for the labor market.
2. To qualify chemists to complete graduate programs.
3. To contribute in community service and volunteer work.

## 3. Program Learning Outcomes*

## Knowledge and Understanding

K1 To understand the basic theories and concepts of chemistry.
K2 To explore the basics of mathematics, physics and biology related to chemical science.
To describe recent experimental findings, developments, and applications of chemistry in life.

## Skills

S1 To demonstrate problem solving skills in chemistry.
S2 To apply good research practices in chemistry and related fields.
S3 To recognize chemicals, equipment, and their appropriate utilization, to carry out practical experiments following safety procedures.
To criticize and analyze chemical data of experimental results based on scientific literature.

## Values, Autonomy, and Responsibility

V1 To demonstrate social responsibility and commitment to ethics in chemistry.
V2 To work effectively, either independently or as a team member to solve a problem.
V3 To show effective oral and written scientific communication.
To retrieve relevant technical information from professional databases and search engines.
V4

* Add a table for each track or exit Point (if any)

## C. Curriculum

## 1. Curriculum Structure

| Program Structure | Required/ Elective | No. of courses | Credit Hours | Percentage |
| :---: | :---: | :---: | :---: | :---: |
|  | Required | 6 | 12 | 9.52\% |
| Institution Requirements | Elective |  |  |  |
|  | Required | 8 | 29 | 23.02\% |
| College Requirements | Elective |  |  |  |
|  | Required | 35 | 85 | 67.46 \% |
| Program Requirements | Elective |  |  |  |
| Capstone Course/Project |  |  |  |  |
| Field Training/ Internship |  |  |  |  |
| Residency year |  |  |  |  |
| Others |  |  |  |  |
| Total |  | 49 | 126 | $100 \%$ |

* Add a separated table for each track (if any).

## 2. Program Courses

| Level | Course Code | Course Title | Required or Elective | PreRequisite Courses | Credit <br> Hours | Type of requirements (Institution, College, or Program) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Level 1 | 111 ICl | The Entrance to the Islamic Culture | Required | - | 2 | Institution |
|  | 101PHYS | Introduction in physics | Required | - | 4 | College |
|  | 101CHEM | General Chemistry -1 | Required | - | 4 | College |
|  | 011ENG | Intensive English Program-1 | Required | - | 6 | College |
| Level <br> 2 | 112IC1 | Islamic culture-2 | Required | - | 2 | Institution |
|  | 201ARAB | Arabic Language Skills | Required | - | 2 | Institution |

* Add a separated table for each track (if any).

## 5. Teaching and learning strategies applied to achieve program learning outcomes.

## Describe teaching and learning strategies, including curricular and extra-curricular activities, to achieve the program

 learning outcomes in all areas.The program offers its courses using several teachings and learning strategies, including traditional lectures, active learning activities (e.g. Problem solving, student presentations), case studies, presentations, laboratory sessions, and research projects.
E-learning has evolved as a supportive teaching method within the department of chemistry using the guidelines stipulated by the E-learning Deanship. All course materials are uploaded on the KKU E-learning platform, Blackboard. In addition, some teaching activities and assessment tasks may be conducted through Blackboard, such as assignments, quizzes, exams, etc. Blackboard also offers the 'Safe Assign' option that assesses the percentage of plagiarism in the submitted assignments. Also, the program provides opportunities for extracurricular activities to promote students' personal skills and experiences, including visits to places related to various applied fields of chemistry (eg. Shagig, AlJazira for painting, poison lab). The aim for these activities is to expose students to real experiences that may contribute to deep, meaningful learning, as well as achievement of the program learning outcomes. The following table shows the teaching strategies used to achieve learning domains.

| PLOs |  | Teaching Methods |
| :---: | :---: | :---: |
| Knowledge | K1 | 1. Classical lectures <br> 2. Data show-based lectures <br> 3. Demonstration using models and movies <br> 4. Historical reviews <br> 5. Problem solving <br> 6. Laboratory experiments |
|  | K2 |  |
|  | K3 |  |
|  |  |  |
|  |  |  |
|  |  |  |
| Skill | S1 | 1. Case study <br> 2. Reading books <br> 3. Heuristic <br> 4.In class cooperative groups <br> 5. Seminar |
|  | S2 |  |
|  | S3 |  |
|  | S4 |  |
| Values | V1 | 1. Team Learning <br> 2. POGIL <br> 3. Problem Solving <br> 4. Tutorial and personal work |
|  | V2 |  |
|  | V3 |  |
|  | V4 | 1. Surveying literature <br> 2. Review and Report <br> 3. Presentation <br> 4. Concentric |

## 6. Assessment Methods for program learning outcomes.

Describe assessment methods (Direct and Indirect) that can be used to measure the achievement of program learning outcomes in all areas.

The program should devise a plan for assessing Program Learning Outcomes (all learning outcomes should be assessed at least twice in the bachelor program's cycle and once in other degrees).

## Program Learning Outcomes (PLOs) Assessment:

Education \& Training Evaluation Commission

The PLO assessment process helps to determine whether the teaching and learning plans are effective. It is also used to test the students' learning of the subject matter that faculty presume to teach. All data obtained from the assessment methods help program to demonstrate whether program courses and learning activities are supporting student learning, promoting student success, and enhancing the institutional priorities consistent with the mission of KKU. A PLO assessment is periodically conducted to achieve three objectives:

- To collect data that indicates whether students are learning as effectively as possible.
- To improve the program.
- To establish outcomes and engage in a systematic process of collecting and analyzing data in order to support evidence-based changes in the curriculum and/or instruction.
Several direct and indirect methods will be used to assess the program outcomes:
- Direct assessment methods include course grade distributions, rubric of CLOs/PLOs achievement method, annual reports, retention, completion rates and Tests of National Center for Assessment (QIYAS) for teachers.
The following table shows the assessment methods used in courses to measure the achievement of students to PLOs.

| PLOs |  | Assessment Methods |
| :---: | :---: | :---: |
| Knowledge | K1 | 1. Essay Questions <br> 2. Completion exorcise <br> 3. Classical examinassions <br> 4. In class tests <br> 5. Homework |
|  | K2 |  |
|  | K3 |  |
| Skill | S1 | Direct observation <br> Multiple choice questions <br> 3. Fast questions <br> 4. Laboratory reports <br> 5. Classical examination <br> 6. Oral discussion and presentations |
|  | S2 |  |
|  | S3 |  |
|  | S4 |  |
| Values | V1 | 1. Problem and case study analysis <br> 2. Short answer questions <br> 3. Presentation and reports <br> 4. Field work report <br> 5. Data interpretation exercise <br> 6. Quizzes <br> 7. Collaborative assignements |
|  | V2 |  |
|  | V3 |  |
|  | V4 |  |

- Indirect assessment methods include stakeholders' feedback obtained through the student experience survey, course evaluation survey, students' evaluation of the quality of their learning experience in the program (program evaluation survey), an alumni survey and employment survey "evaluation of graduates".

## Course grade distributions:

PLOs can be assessed through the course's final grades. The grade distribution analysis report is done to ensure the quality of the courses taught and the achievement of the PLOs. A course grade distribution report shows the final grades given in each course and section. It aims to evaluate students' performance on their exams during the semester, as well as provide an indication of any concerns or failure results. In addition, it reports the number of students who were denied entry and the number of students who withdrew from the course. This report is prepared at the end of each semester and discussed in the departmental meetings.

Education \& Training Evaluation Commission

#### Abstract

Course and Annual Program Reports: The program and course reports were prepared using the NCAAA templates. These reports include several details regarding course issues, analysis, action plan, and priorities for improvement. These eventually lead to the identification and assessment of the courses and program quality. The annual program report represents data from enrolment management and cohort analysis. The program coordinator is responsible for the preparation of the annual program report. This report is intended to compile the course reports from each department and determine the actions requiring intervention by a higher administrative level. At the end of each semester, all the course coordinators from both campuses prepare the course reports. The reports are also included in the plans that address the identified problems.

## D. Student Admission and Support:

## 1. Student Admission Requirements

There are no specific admission regulations for the current program. Instead, the program committed with the admission regulations of King Khalid University, please see the attached Admissions Guide. Department of Chemistry (DC) is committed to fair, transparent and consistent admissions practices. DC reaffirms its policy of equal opportunity for both male and female students as they are subjected to the same admission procedures and requirements. The admission of prospective chemistry program students is always carried out online via Deanship of Admission and Registration (DAR) website. Full details regarding admission requirements are updated annually by DAR and can readily be found on DAR's website. The number of admitted students is determined by DAR after conferring with DC. Generally, an applicant must be a Saudi national holding a general secondary certificate (i.e. high school) or any valid equivalent from outside KSA. Priority consideration for admission is given to fresh high school graduates whose applications must meet the minimum requirements for automatic admission which include a pre-set average qualifying score between high school diploma score and national standardized tests (i.e. general aptitude test and scholastic achievement admission test). Once all requirements are met, applicants are informed through e-mail and mobile messages (SMS) about their admission status. Directly, students enter the program of chemistry.

## 2. Guidance and Orientation Programs for New Students

(Include only the exceptional needs offered to the students of the program that differ from those provided at the institutional level).

An open orientation program is organized in the first week of the first semester for guidance and advising the new students. The program includes advisory presentation from the vise dean and the academic advisor about courses registration, grades, student's service, student's rights, duties and safety issues as well. See attached Orientation for new Students A comprehensive orientation program is provided to new students at the beginning of the academic year by the academic advising and counseling unit. This orientation session is attended by the dean, department heads, and teaching staff. The goal of the orientation session is to provide comprehensive information pertaining to the campus life, academic rules and regulations, facilities, lab safety, learning resources, courses offered by individual departments, and teaching and assessment methodologies. The orientation session is also used as an opportunity to introduce faculty members teaching different courses. Orientation for female students is provided by the Assistant Dean in coordination with the academic advising and counseling unit in the female campus.

## 3. Student Counseling Services

(Academic, professional, psychological and social)
(Include only the exceptional needs offered to the students of the program that differ from those provided at the institutional level).

# هيئة تقويم التعليم والتدريب 

Education \& Training Evaluation Commission

#### Abstract

An assigned faculty academic advisor along with Academic Counseling and Guidance Unit at the college is available. They provide counseling, assessment, information, advice, personal and social development program, and referral. Regular interactions of students with instructors through e-mail, blackboard or planning for regular meetings to discuss academic issues are also available. Documents for students counseling services are attached.

## 4. Special Support

(Low achievers, disabled, gifted, and talented students).
Students with special needs (disabled, low achievers, gifted and talented) have special support from the academic advisor of the students. Talented students also have distinct attention and support from the Talent and Creativity Center at the university. Documents are attached.

Low achievers:
Academic Advising and Counselling Unit (AACU) in male and female sections directed most of the counseling services to underperforming students (students with a GPA < 2.5 ) but with different approaches. In the male section, the underperforming students were allotted to Arabic speaking faculty where regular counseling sessions are conducted and documented.
To assess the impact of counseling, AACU embargos students' grades for quizzes and midterm until they visit their respective advisors. The advisor will then send a formal request to the vice dean for academic affairs to lift students' mark embargo. In the female section, the underperforming students were allotted to Arabic speaking advisors. The advisors met with the students and documented their visits (on paper and via academia). The AACU then compiled students' reports from the advisors and used a "design thinking" strategy to identify and resolve major problems.
At the end of each term, the academic advising and counseling unit discusses all issues and requirements of the unit with the Vice Dean of Academic Affairs and reports the dean of the with the requirements and recommendations. All recommendations are to be taken in consideration to meet the students' demands and improve their performance with systematic action plans that ensure attaining optimal results.

## Talented and gifted students:

The academic advising and counseling unit also identifies talented and underperforming students and implements particular motivational programs for them. Extracurricular activities at Department of Chemistry are encouraged through students' club where ample sports, educational, and cultural activities performed. Department of Chemistry applies efficient procedures for monitoring students' progress towards fulfilling graduation requirements and provides career development programs that align with the market needs. It is worth mentioning that Department of Chemistry recently formed alumni association to establish a comprehensive database about them, involve them in department events and benefit from their views and expertise in matters concerning the curriculum and the profession. In addition, Department of chemistry acknowledged the importance of international exposure to its students. Thus, Department of chemistry in collaboration with the university administration initiated a summer training program abroad for talented students and students with a high GPA. The selected students will be going on a 6-weeks abroad training program with international universities.

## E. Faculty and Administrative Staff:

1. Needed Teaching and Administrative Staff

| Professor | Chemistry | 1 | Organic | 2 | 2 | 4 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 1 | Inorganic |  |  |  |
|  |  | 1 | Analytical |  |  |  |
|  |  | 1 | Physical |  |  |  |
| Associate Professor | Chemistry | 3 | Organic | 4 | 5 | 9 |

| Lecturer | Chemistry | 2 | Organic | 4 | 4 | 8 |
|  |  | 2 | Inorganic |  |  |  |
|  |  | 2 | Analytical |  |  |  |
|  |  | 2 | Physical |  |  |  |
| Teaching Assistant | Chemistry | 2 | Organic | 4 | 4 | 8 |
|  |  | 2 | Inorganic |  |  |  |
|  |  | 2 | Analytical |  |  |  |
|  |  | 2 | Physical |  |  |  |
| Technicians and Laboratory Assistant | Chemistry |  |  | 8 | 12 | 20 |
| Administrative and Supportive Staff | Administrat ive | 1 | Program instructor | 3 | 2 | 5 |
|  |  | 1 | Head of Chemistry Department |  |  |  |

## F. Learning Resources, Facilities, and Equipment:

## 1. Learning Resources

Learning resources required by the Program (textbooks, references, and e-learning resources and web-based resources, etc.)
The head of the department assigns committee for the plan and curriculum. One of the tasks of this committee is to update learning resources, facilities and equipment, and follow-up the availability of these resources to students. In this issue, the following processes are regularly practiced:
$>$ Updating and assigning textbooks and references are approved in the departmental council.
$>$ The Deanship of Library Affairs commits to supply hard-copies and soft-copies of learning resources after requesting by the Head of the Department.
$\rightarrow$ Materials of software programs for learning resources are supplied to academic programs by the Deanship of Information Technology after requesting by the Head of the Department.

## Saudi Digital Library (SDL):

KKU maintains an active subscription to Saudi Digital Library and make it available to students inside and outside the department using a proxy system. The access to databases on Digital Saudi Library web is available $24 / 7$ to students and faculty members. The Deanship of Library Affairs (DOLA) provides access to Saudi Digital Library website [http://lib.kku.edu.sa/guidance.html] through the main KKU library website. This includes access to different scientific websites and search engines such as Doab directory of open access books, and E-book central. The SDL contains more than 310,000 E-books, 100,000 periodicals, 184 electronic databases, 5 million theses. Annually, the DOLA requests all colleges within the university to provide them with the college's requirements from SDL.

## E-learning services:

The E-learning services offered by the Deanship of E-learning in order to promote an effective communication between faculties and students including Blackboard system. TAZAMON, and KKU. It has been made mandatory in all the courses of the program that the faculties have to upload all their teaching material, tests, assignments, quizzes and all announcements through Blackboard system.

## Software packages:

KKU provides several software packages for students and faculty free of charge. This aims to improve the efficiency and effectiveness of teaching and learning experience in KKU. The free software packages include Office ${ }^{\circledR}$, some statistical and antivirus software. In addition, the College of science on both the
campuses has sufficient number of classrooms, laboratories, conference rooms, faculty and administration rooms etc. that are equipped with all the necessary facilities.

## 2. Facilities and Equipment

## (Library, laboratories, classrooms, etc.)

The committee of equipment and technical affairs at the department is responsible to follow the requirements of equipment in laboratories.
Classrooms:
The classrooms in the both the campuses comprise of computers, white boards, podium, with comfortable chairs and projectors. The computers are of Dell Core i5 model and the projectors that are used are of Optoma DLP Texas model. The classrooms are air conditioned, well ventilated that is suitable to create a good environment for learning. The provided teaching and learning facilities cover the teaching strategy of each learning outcome. For some of the courses, lectures are delivered through virtual classrooms using the blackboard.
Laboratory:
The department has seven student Labs for teaching practical course in chemistry branches in male section and nine Labs. in female section. Each Lab. has staff member as 20 supervisor and one technician beside the course instructor. The student labs contain the necessary learning tools; glass wears, chemicals and instruments. The safety tools are provided as well; Lab. coat, safety glasses, gloves and face mask.

Research Labs:
Chemistry department contain nine research Labs; Physical chemistry research lab., chromatography research lab., catalysis lab. , spectroscopic analysis lab., two organic chemistry lab., inorganic chemistry lab., graduation research lab, NMR lab., ICP-Ms lab.
Each research lab. has responsible staff member and technician. The research labs are provided with core instruments necessary for chemistry research.

## 3. Procedures to ensure a healthy and safe learning environment

## (According to the nature of the program)

The committee of safety and occupational health affairs at the department is responsible to maintain a healthy and safe environment for faculty, staff, and students and provides security system and guards to secure the facilities. In addition, fire evacuation policy and fire drills are available in all laboratories with first aid kits. The department provides a safe and healthy environment, the department has safety signs, emergency exit signs and laboratory safety manuals. The laboratory is an essential part of the successful teaching and learning for all courses that have practical sessions in the labs. The teaching quality in the laboratories is one of our priorities, since wet laboratories need special instructions and a unique teaching style. To ensure that the department' laboratories have good teaching environments, all laboratories are well equipped with personal protective equipment such as masks, safety goggles, safety gloves, etc. A fire evacuation policy and first aid kits are also available in all laboratories.

## G. Program Quality Assurance:

## 1. Program Quality Assurance System

## Provide a link to quality assurance manual.

The college has responsibilities for internal quality assurance, standards and enhancement procedures. These procedures are designed to meet the expectations of the Education Training Evaluation Commission

Education \& Training Evaluation Commission

> as well as other national frameworks, benchmarks, and statutory obligations. The Quality and Academic Development Unit helps to support departments in fulfilling their responsibilities within both the college's quality assurance framework and the broader national and international context. Departments are encouraged to contact The Quality and Academic Development Unit Team for advice and support. Quality Assurance brochure is attached.
> Link of quality assurance manual of KKU

## 2. Procedures to Monitor Quality of Courses Taught by other Departments

The quality of courses and the undergraduate program is monitored, assured, and subject to review and improvement through a continuous improvement cycle based on the cycle shown above. The following points address the details:
a. Individual faculty members \& coordinators and the group/team as a whole review annually by the curriculum committee and within the divisions of the department the program.
b. Curriculum subcommittees and departmental committees are formed to look into the recommendations of various divisions and to make a final proposal
c. The revised program is discussed in the College Board before approval.
d. One course coordinators is assigned by the head of department and is responsible for monitoring the course quality formal meeting of course organizers and student representatives
e. Course improvement committee meets regularly to revise the course content and methods of teaching \& assessment
f. Course coordinator prepares the course report by the end of each semester containing student's achievement, and action plan for course improvement.
g. Program coordinator prepares annual program report at the end of academic year, including all branches where program is offered.
Annual program report discussed in departmental board, and action plan to improvement program will be suggested.
(1) Plan: Course coordinator plan delivery, activities, and assessments of the course.

Involvement: Course coordinator + Director of undergraduate program (2) Implement: Course coordinator implement plan for course delivery.

## Involvement: Course coordinator

(3) Monitor: Director of undergraduate program monitor course delivery and conduct all relevant tasks. Involvement: Director of undergraduate program
(4) Review: Course coordinator, director of undergraduate program, and students review the delivery of the course.
Involvement: Course coordinator + Director of undergraduate program + Students
(5) Improve: Director of undergraduate program prepares a plan for improvement according to step 4, and communicate the plan to quality assurance committee then to department chair and follow it up.
Involvement: Director of undergraduate program + Quality assurance committee +
Department chair
(6) Approve: Plan for improvement developed in step 5 must be approved by Committee
of Academic Planning and Curriculum, Program Advisory Board, and Department Council.
Once approved it will go back to course coordinator and director of undergraduate program for planning and implementation.
Involvement: Committee of academic planning and curriculum, Program advisory board, and Department council.

## The department levels

The department of chemistry is committed to providing the highest quality teaching and learning by closely monitoring their academic courses through internal department committees. The purpose of these committees is to ensure the quality of course materials, of the teaching and learning processes, of student support and assessments, and of faculty members. Committees include the educational services committee,

Education \& Training Evaluation Commission
quality and development committee, scheduling and examination committee, graduate committee, and academic advising and counseling committee.

## Academic policies and procedures:

Several policies have been established to ensure program quality, such as the examination policy and its related committees. Regulations regarding exams, exam oversight, student attendance, alternative exams, exam re-correction, exam preparation, and conduct and correction procedures, have all been established in the program and monitored by the head of department. In addition, KKU has established a Guide for Student Rights and Responsibilities to ensure a fair and consistent process of student management. This guide provides a clear code of conduct with related sanctions to be imposed in the incidence of misconduct or violations.
Moreover, attendance and absenteeism rules are explained clearly to the students at the "new students' orientation" program and then reinforced at the beginning of each semester. Furthermore, a student's excuses are studied and processed through the Excuses committee in the department.
KKU has a policy for any form of cheating during any form of exam. If cheating occurs in an exam, a written report on the incident will be submitted to the college disciplinary committee for further evaluation. KKU policy also encourages good student-faculty relationships. The program is committed to providing full access to all necessary resources
for all students, including those with disabilities.

## Course-level monitoring procedures:

1. Course syllabus 24 At the beginning of each semester, each course coordinator uploads the course syllabus to Blackboard. This syllabus should include a short course description, course learning outcomes (CLOs), teaching strategies, assessment methods, resources, list of topics (theory and practical), time for each section, campus location where the course is taught, proposed exam time, instructions, required reference books, instructor's office hours, contact information and course policies

## 2. Course Report (CR):

The NCAAA templates are used to prepare the course reports (CR). These reports provide information on the different scales of achievement of course learning outcomes. Course reports are submitted to the quality committee within the department. All course reports,
SPSS grade analysis, assessment master blueprint and exam item analysis. The improvement priorities and recommendations are further discussed with the quality assurance (QA) committee members of department. Then, they are discussed at the department meeting, resulting in recommendations and proposals for improvement. If there is any needed action, the faculty member must propose an action plan in his/her course report (recommendation section) and this plan must be implemented during the next semester.

## Program-level monitoring procedure:

A. The Annual Program Report (APR):

The APR is prepared by the Quality Committee within the department. This report highlights achievements, issues and future action plans. A number of recommendations are typically adopted in the department to improve the quality of the program. These involve revising courses scientific contents, advising and counseling plans, educational services, research, faculty development, and student statistics.

## B. Laboratory safety monitoring mechanism

The laboratory is an essential part of the successful teaching and learning for all courses that have practical sessions in the labs. The teaching quality in the laboratories is one of our priorities, since wet laboratories need special instructions and a unique teaching style. To ensure that the program laboratories have good teaching environments, all laboratories are well equipped with personal

Education \& Training Evaluation Commission
protective equipment such as masks, safety goggles, safety gloves, etc. A fire evacuation policy and first aid kits are also available in all laboratories.

## C. Key Performance Indicators (KPIs):

Several key performance indicators (KPIs) are approved by the program and measured according its time frame to monitor the program and offer feedback from stakeholders (students, advisory board, alumni, and employers).

## 3. Procedures Used to Ensure the Consistency between Main Campus and Branches (including male and female sections).

The coordinator of program is responsible to ensure that the courses content achieve PLOs. Program coordinator revises course specification and annually course reports.
The course report includes the student's results for both male and female sections and their statistics, the teaching strategies, assignment methods were explained. The annual program report includes the both male and female sections Many measures and arrangements are in place to ensure consistency between male and female sections regarding teaching/learning activities, extracurricular activities, facilities and resources, examinations and quality measures.
The male and female students and faculties are on different campuses (Alfaraa and female campus King Abdullah Road, respectively) and provided with adequate the requirement facilities of program.
The program at female campus is administered by supervisor of department. She maintains a close association with the head of department at the main campus to warrant appropriate development and to provide a statement of performance of the female students in the program. The registration and enrollment of students at different levels is cooperatively achieved by registrars from the male and female sections. A clear protocol is available for effective communication between the Alfaraa and female campus; female faculty and staff attended meetings of department council in an audio conference room. In addition, advanced and reliable technological tools are also used to facilitate communication. The lectures and labs on both campuses are taught in a uniform manner. Female and some male teaching staff are exclusively teaching the female students. The faculty on both campuses is teaching the same courses, planning and developing their respective course materials and requirements together. This ensures that the same topics are taught in both sections. Both campuses' faculties contribute equally in writing the examination questions, while the head of department and supervisor of female department ensure the appropriateness and suitability of the exams for each course and responsible for ensuring that the teaching, training and assessment methods are similar in both sections, according to regulations. Thus, it is mandatory for both the male and female teaching staff to communicate regularly by using advanced communication tools. This enhances the maximum level of coordination between the sections with respect to the development of courses and programs. The planning, implementation and progress of the program and courses are similar on both the campuses, according to the report provided by the NCAAA template. Male and female faculties (coordinators for the same courses) use the Blackboard platform to inform students about the upcoming course tasks and duties and to post the student marks.
Members of each committee in the department are recruited from both the male and female faculty members to monitor both campuses and the students. This provides equal opportunities to participate in all the activities at the department. Procedures applied to ensure the consistency between male and female sections:

- The same course contents, teaching strategies and assessment methods.
- Identical time tables for both sections.
- Simultaneous examinations in both sections.
- Separate course reports for each section to ensure evaluation of course quality for both sections and combined one.

[^0]:    *Attach the previous version of the Program Specification.

[^1]:    - Analysis of program indicators stressing any differences between male and female sections.
    - Program statistical data stressed male and female results and combined one.
    - learning resources and facilities are almost at the same level in both sections including the average number of students enrolled per class, teaching aids, laboratories, internet coverage, library and extracurricular activities
    - Male and female students result in examinations are reflected in separate course reports and combined one to explore any differences in courses completion rate, grade distributions and trend over time in either sections as well as the combined one.
    - Other course evaluations including achievement of courses and program learning outcomes, courses and program evaluation surveys and course reporting, all these evaluations expressed the female and male as well as combined results with supposed improvements based on evaluations, and consequently a separate course portfolio for both male and female sections as well as a combined one for each course are there.
    - Courses and program evaluations and types of surveys are conducted for both sections simultaneously using the same methods, analysis, interpretations and improvement actions.
    - Male and female students' representatives are involved in relevant committees.

    Results and analysis of program KPIs are usually done for both sections and for combined one based on the availability of data with suggested section wise improvement when required
